Selected BLS Economic Indicators

Washington-Arlington-Alexandria

Selected Indicators

This fact sheet presents recent employment and unemployment, price, and pay data for the District of Columbia, Maryland, Virginia, and the Washington-Arlington-Alexandria Metropolitan Statistical Area (MSA), and the United States. The Consumer Price Index (CPI) measures price changes, or inflation, for particular commodities and services at the retail level. The Producer Price Index (PPI) measures price changes, or inflation, for particular commodities and services at the wholesale level, and is widely used by business firms as an escalator in long-term contracts. The Employment Cost Index (ECI) measures price changes, or inflation, of labor costs which includes wages and salaries and employer costs for employee benefits. An occupational pay relative is a calculation of pay (wages, salaries, commission, and production bonuses) for a given metropolitan area relative to the nation as a whole; the calculation controls for differences among areas in occupational composition, establishment and occupational characteristics, and the fact that data are collected for areas at different times during the year.

Consumer Price Index (1982-84) = 100	March 2006	March 2007	Percent change
All Urban Consumers (CPI-U)
